Passage

- Anwar Anwar, a British military aviator, was hovering over Italy one night in March 1944 when **his plane was hit by enemy fire**. Flaming gasoline shot down the whole length of the plane. Anwar reached to (5) find it a mass of fire. What could he do? **The parachute was obviously too far gone** to be usable even if he could put out the rising flames. His boots were already beginning to burn. He decided to jump, preferring sudden (10) death on the ground to being burned alive in the sky. **This is the end**, he thought, as he jumped into black space 18,000 feet from ground.

- This is all he could remember **until he awoke** to see a small patch of stars overhead. Was he dead? He (15) turned his head and moved his arm. His head ached and his back pained sharply. He felt cold damp and noticed he was lying in snow four feet deep in a thick forest. Slowly he moved his legs and tried to sit up.

- His boots were gone, and his flying suit was (20) torn to pieces. He looked up and down not believing what he saw. Large broken branches above his head showed where he had dropped into the big trees before crashing through at reduced speed to the wonderful bed of snow where he had rested deep and protected from the wind for three hours.

- When he was finally carried into a village, the (25) Italian soldiers who took him prisoner laughed at his story. But higher Italian authorities discovered that his story was true, which resulted in Anwar's being given a paper, signed by an Italian officer, stating that he had actually fallen 18,000 feet without a parachute and lived!

Rumor is the most primitive way of spreading stories – by passing them on from mouth to mouth. But civilized countries in normal times have better sources of news than rumor. They have radio, television and newspaper. In times of stress and confusion, however, rumor emerges and become rife. At such times the different kinds of news are in competition: the press, television, and radio versus the grapevine.

Especially do rumor spread when war requires censorship on many important matters. The customary news sources no longer give out enough information. Since the people cannot learn through legitimate channels that they are anxious to learn, they pick up "news" wherever they can and when this happens, rumor thrives.

Rumors are often repeated even by those who do not believe the tales. There is a fascination about them. The reason is that the cleverly designed rumor gives expression to something deep in the hearts of the victims – the fears, suspicions, forbidden hopes, or daydreams which they hesitate to voice directly. Pessimistic rumors about defeat and disasters show that the people who repeat them are worried and anxious. Optimistic rumors about record production or peace soon coming point to complacency or confidence – and often to overconfidence.

96. The author is primarily concerned with
1. the nature of the rumor
 2. the fascination of rumor
 3. rumors as primitive man's newspapers
 4. creating a case against rumors
97. The author suggests that rumors usually
1. alarm their hearers
 2. are hardly in their growth
 3. are disheartening
 4. reflect a lack of confidence in government

98. According to the passage, people who repeat a rumor as truth want to do so because they A
1. are impressed with the antiquity of this method of spreading news
 2. are naturally gullible and willing to be duped
 3. have a deeply ingrained pessimistic strain
 4. find that the rumor reflect their own unexpressed beliefs
